Hi Lewis,

Here are some of the files for 2021: It might be easier to start with day 063 of 1996. I have included a few .tar files, but it's taking a while to upload. I have listed the download links from USGS below. It's not yet finished, but I wanted to have this sent to you before I fly out to Frascati today. I can add more stuff (e.g. ROIs) later once I get to Frascati.
